

Ahmed Hamdi

Senior Full Stack Engineer | Frontend Architecture | AI-Enabled Enterprise Platforms

Dubai, United Arab Emirates | +971 52 201 6367 | ahmedhamdi352@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 6+ years of experience building scalable enterprise web applications, frontend architectures, internal platforms, dashboards, and AI-enabled digital products. Strong experience with React, Next.js, TypeScript, Node.js, Python, REST APIs, and secure enterprise integrations. Experienced in government and enterprise environments, delivering production-ready systems with a focus on maintainability, performance, user experience, and cross-functional delivery.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, component architecture, responsive UI, state management, performance optimization

Backend & APIs: Node.js, Express.js, Python, REST APIs, API integration, SQL, MongoDB

AI-Enabled Products: LLM integrations, AI chatbots, document processing, workflow automation, analytics dashboards

DevOps & Delivery: Docker, CI/CD, Jenkins, Git, GitLab, secure deployment workflows

Engineering Practices: code reviews, unit testing, Agile/Scrum, reusable UI patterns, cross-functional delivery, technical mentoring

PROFESSIONAL EXPERIENCE

Senior Full Stack Engineer | Dubai Police - Department of AI

Jul 2025 - Present | Dubai, United Arab Emirates

- Build and maintain secure enterprise AI-enabled web platforms for internal and public-facing digital channels in a high-security government environment.
- Contributed to AIX, an AI chatbot platform deployed across website and mobile applications, connecting conversational experiences with backend AI services and operational workflows.
- Develop back-office dashboards for chatbot operations, customer insights analysis, service monitoring, reporting, and operational visibility.
- Contribute to AI Service Hub, an on-premises enterprise platform that enables internal teams to securely access AI services through governed workflows, reusable integrations, and role-based service access.
- Integrate frontend applications with backend services and APIs using React, Next.js, TypeScript, Node.js, Python, and RESTful architecture.
- Collaborate with product, security, backend, and mobile teams on architecture decisions, code quality, and production-ready delivery aligned with enterprise security requirements.

Senior Front-End Developer | Apps Wave

Jan 2024 - Jun 2025 | Remote - Amman, Jordan

- Developed scalable React and Next.js interfaces for enterprise and public-facing platforms across web and mobile experiences.
- Built reusable component patterns and integrated REST APIs to improve delivery speed, consistency, and maintainability across projects.
- Contributed to Misk City digital products, including a React Native mobile app and React.js web experience for city services, events, and community features.
- Enhanced PIF CoBuilderOps interfaces with focus on performance, usability, project management workflows, and seamless user experience.

Senior Full Stack Developer | Barq Systems

Jan 2022 - Jan 2024 | Cairo, Egypt

- Delivered full-stack web applications using React, TypeScript, Node.js, REST APIs, and modern frontend architecture patterns.
- Mentored junior developers through code reviews, implementation guidance, and adoption of maintainable engineering practices.
- Improved testing practices, validation flows, and code quality standards across critical features to reduce application defects.
- Refactored legacy code to improve maintainability, readability, performance, and long-term scalability.

Front-End Developer | Terkwaz Business Solution

Sep 2020 - Jan 2022 | Remote - Amman, Jordan

- Built responsive web applications using HTML, CSS, JavaScript, React, and modern frontend tooling for desktop and mobile users.
- Translated UX/UI designs into functional web interfaces with strong attention to responsiveness, usability, and cross-browser compatibility.
- Integrated frontend features with REST APIs and collaborated with backend teams to deliver complete product functionality.

Front-End / Full Stack Developer | Cuisine Company

Jan 2018 - Sep 2020 | Cairo, Egypt

- Built a POS system to manage restaurant operations across sales, administration, and internal workflow modules.
- Developed frontend interfaces using React, Redux, and modern JavaScript development practices.
- Contributed to backend development using Python Django, PHP Laravel, Node.js, and SQLite for internal business workflows.

SELECTED PROJECTS

Aix Chatbot Platform

AI chatbot deployed across website and mobile channels to support user interactions, AI-powered services, and internal operational workflows.

Contribution: Worked on production-facing conversational experiences, backend AI service integration, and operational dashboard connectivity.

Tech: React, Next.js, TypeScript, Node.js, Python, REST APIs, AI Service Integration

AI Service Hub

Secure on-premises enterprise platform that helps internal teams access and consume AI services through governed usage, reusable integrations, and enterprise controls.

Contribution: Focused on reusable service access patterns, governed workflows, and secure integration between frontend, backend, and service layers.

Tech: React, Next.js, Node.js, Python, Service Integrations, Secure Workflows

Customer Insights & Chatbot Back Office

Operational dashboards for chatbot analytics, customer insights, service monitoring, reporting, and performance visibility.

Contribution: Built user interfaces that convert AI and chatbot activity into actionable insights for support, business, and operations teams.

Tech: React, TypeScript, Dashboards, REST APIs, Analytics

Misk City Digital Products

Cross-platform React Native app and React.js website for city services, events, community features, real-time updates, and personalized interactions.

Contribution: Delivered responsive features, API integrations, reusable UI patterns, and mobile/web user flows for public-facing digital products.

Tech: React Native, React.js, REST APIs, Responsive UI

PIF CoBuilderOps

Project management platform supporting task management, progress tracking, resource allocation, and team collaboration workflows.

Contribution: Enhanced interface performance, usability, workflow clarity, and maintainability for construction and infrastructure project operations.

Tech: React.js, UI Performance, Project Management Workflows

EDUCATION

Bachelor of Science in Computer and Information Sciences | Ain Shams University, Cairo, Egypt | Sep 2013 - May 2017

LANGUAGES

Arabic: Native | **English:** Professional working proficiency
